This bibliography is intended to be an up-to-date resource for studying and researching contemporary Afghanistan. The vast majority of sources included are from after the late 1970s, except for in the bibliography section on ethnic groups and, to a lesser extent, on Islam. I did not compile sources on linguistics, art, literature, pre-/mid-20th Century history or on the natural sciences (unless applied to resource management), and the sources on the Soviet-Afghan war are limited (a specific section on the Soviet-Afghan War may be added in the future). You should be able to find sources such as these in some of the various standard Afghanistan bibliographies that have been published in book form. However, these bibliographies are usually poor in regards to more recent sources.

This bibliography will remain confined to sources published in English, with a few select sources in French, German and Russian. It will be updated approximately once per year to include newly published sources plus older sources that were inadvertently omitted. Check the website for new editions. If you would like to suggest a book or other source for inclusion, preferably from an academic journal or well-established research institute, please send your suggestion to contact@afghanistan-analyst.org

Due to time and budget constraints, the next edition may not be published until 2013.

The Afghanistan Analyst  Law Bibliography Introduction

This bibliography is intended to be an up-to-date resource for legal study and research pertaining to modern Afghanistan (1747 and later). Many sources are only available through legal search engines, such as Westlaw and Lexis-Nexis, or through academic databases such as JSTOR, ProQuest, EBSCO, or HeinOnline. Hyperlinks are provided to sources that are freely available. For books, hyperlinks are provided to Google Books because this often offers a free preview and multiple options to purchase the book if one cannot be obtained from a nearby library.

Most articles herein that discuss comparative law have a common law audience in mind. This should not be problematic for readers with civil law backgrounds. Afghanistan borrows heavily from the civil law tradition, so the learning curve is not as steep as it is for readers educated in common law jurisdictions.

Hyperlinks to Google Books are not an endorsement of any merchants listed by Google Books. With all hyperlinks, care has been taken to only link to sites that are not malicious and that post materials that appear to be lawful and comply with copyright laws. However, websites occasionally change owners, rename files, or are targeted by malicious hackers. Users of this bibliography assume all risk when clicking on links to third-party sites.

Recommendations are welcome regarding the organization of this bibliography and inclusion (or exclusion) of any sources. I also welcome hyperlinks that I have inadvertently omitted to sources listed herein which are available online. Send suggestions to: timothy.mathews@maine.edu or contact@afghanistan-analyst.org.
